USER'S MANUAL BEDIENUNGSANLEITUNG MANUAL DE INSTRUCCIONES MANUALE D'USO MODE D'EMPLOI ユーザーマニュアル

Important Safety Instructions

- 1 Read these instructions.
- 2 Keep these instructions.
- 3 Heed all warnings.
- 4 Follow all instructions.
- 5 Do not use this apparatus near water.
- 6 Clean only with dry cloth.
- 7 Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8 Do not install near heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9 Only use attachments/accessories specified by the manufacturer.
- 10 Refer all service to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- Warning!** To reduce the risk of fire or electrical shock, do not expose this equipment to dripping or splashing and ensure that no objects filled with liquids, such as vases, are placed on the equipment.
- Service** All service must be performed by qualified personnel.
- Caution:** You are cautioned that any change or modifications not expressly approved in this manual could void your authority to operate this equipment.
- EMC/EMI** This equipment has been tested and found to comply with the limits for a Class B Digital device, pursuant to part 15 of the FCC rules.
- The limits are designed to provide reasonable protection against harmful interference in residential installations.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions – may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception – which can be determined by turning the equipment off and on – the user is encouraged to try correcting the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from the one to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

For the customers in Canada: This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

- Precaución!** Para reducir el riesgo de incendios o descargas eléctricas, no permita que este aparato quede expuesto a salpicaduras y asegúrese de no colocar sobre él ningún objeto que contenga líquidos, como un jarrón, para evitar que se pueda derramar.
- No instale este aparato dentro de un espacio confinado, como encastrado en una librería.
- Atención:** Cualquier reparación debe ser realizada únicamente por personal de un servicio técnico oficial.

Attention: Le advertimos que cualquier cambio o modificación que no aparezca aprobada expresamente en este manual puede anular su autorización a utilizar este aparato.

- Attention Danger!** Pour éviter tout risque d'électrocution ou d'incendie, ne pas exposer cet appareil à quelque source liquide (gouttes d'eau, projections liquides etc.) et veiller à ne poser aucun objet contenant un liquide sur l'appareil.
- Do not install in a confined space.

Service Confitez toutes les opérations de maintenance à un personnel qualifié.

Attention: Toute modification apportée à l'appareil et qui n'est pas expressément préconisée dans ce manuel invalide votre droit à utiliser cet appareil.

Lors du remplacement de la pile, suivez attentivement les instructions spécifiées dans ce manuel.

Take Control of your Vocal Sound!

(EN) Introduction

VoiceTone Correct XT gives your vocals a studio-produced sound with the peace of mind that comes from automatic anti-feedback.

Congratulations on your purchase of Correct XT. Use it to make your vocals brighter, more balanced and more in tune than ever before without having to learn complicated outboard equipment. When feedback is a problem, the automatic anti-feedback feature hunts and silences those pesky squeaks and squalls quickly.

- Super-simple setup and control
- To anti-feedback on/off footswitches
- Separate Tone and Pitch on/off footswitches
- Compression and de-ess smooth peaks and sibilance
- Balanced XLR in and out with phantom power for condenser microphones
- 1/4" instrument input-to-DI convenience feature
- USB connection to computer for easy firmware updates, news and tips via the free VoiceSupport application

www.tc-helicon.com - www.youtube.com/tchelicon

(DE) Einleitung

Mit dem VoiceTone Correct XT können Sie Ihr Publikum auch live mit einem Vocal-Sound in Studioqualität überzeugen. Und die integrierte automatische Rückkopplungsunterdrückung schont Ihre Nerven.

Wir gratulieren Ihnen zum Kauf Ihres Correct XT. Verwenden Sie es, um Ihre Stimme höhnerreicher, ausgewogen und tressicher klingen zu lassen – und das alles, ohne erst den Umgang mit kompliziertem Outboard-Equipment lernen zu müssen. Und wenn Feedback droht, macht die automatische Rückkopplungsunterdrückung kurzen Prozess mit unerwünschten Pieper und Jaulen.

- Extrem einfache Einrichtung und Steuerung
- Der adaptive Multiband-Shape-EQ passt sich dem individuellen Klang Ihrer Stimme an.
- Separate Ein-/Aus-Taster für Klangebearbeitung (Tone) und Tonhöhenkorrektur (Pitch)
- Der integrierte Kompressor und der De-Esser „entschärfen“ Pegelspitzen und Zischlaute
- Symmetrische XLR-Ausgang und -Eingang mit Phantomspeisung für Kondensatormikrofone
- Klinkeneingang für Durchlagent im Di-Box
- Per USB an Computer anschließbar – für einfache Firmware-Updates, News und Tipps mit Hilfe der kostenlosen Software VoiceSupport

www.tc-helicon.com - www.youtube.com/tchelicon

(ESP) Introducción

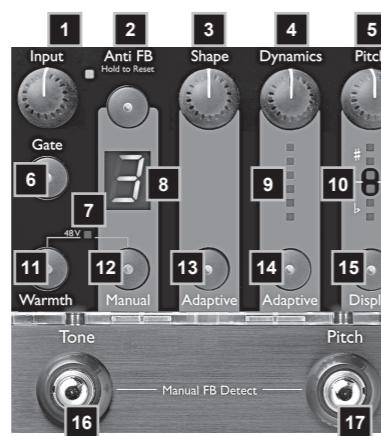

El VoiceTone Correct XT da a sus voces un sonido con calidad de estudio, con toda la tranquilidad que le ofrece su anti-realimentación automática.

Felicidades y gracias por su compra del Correct XT. Uselo para hacer que sus voces sean más brillantes, balanceadas y afinadas que nunca hasta la fecha, pero sin la complicación de tener que usar complejos aparatos externos. Cuando la realimentación sea un problema, la función de anti-realimentación automática se ocupará de silenciar rápidamente esos molestos pitidos.

- Configuración y control super sencillos
- El EQ de modelado multibanda se adapta a cada voz concreta
- Pedales on/off Tone y Pitch independientes
- La compresión y el de-esser suavizan los picos y sibilancias
- Entrada y salida en XLR balanceado con alimentación fantasma para micrófonos condensadores.
- Megafunción de entrada de instrumento de 6.3 mm-a-DI
- Conexión USB a ordenador para descargas de firmware, actualizaciones, noticias y consejos por medio del programa gratuito VoiceSupport.

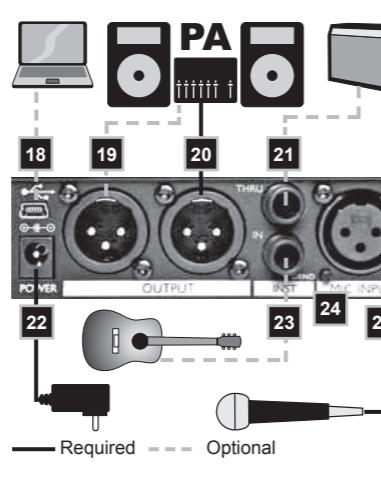

www.tc-helicon.com - www.youtube.com/tchelicon

Front Panel

- 1 - Input: green=signal, amber=OK, red=clip
- 2 - Anti-feedback on/off. CAUTION see below
- 3 - Shape brightens, reduces mud
- 4 - Compression and de-ess amount
- 5 - Auto-chromatic pitch correct amount
- 6 - Auto gate on/off
- 7 - Phantom power active LED
- 8 - Anti-feedback filters active
- 9 - Compression amount: 1LED/dB
- 10 - Pitch correct display
- 11 - Warmth adds lows without mud
- 12 - Manual anti-feedback on/off

Back & Connections

- 13 - Adapts Shape EQ to your voice
- 14 - Adapts Compression to your singing
- 15 - Pitch display on/off
- 16 - Tone (Shape+Dynamics) on/off
- 17 - Pitch correct on/off
- 18 - USB connection to computer
- 19 - Instrument DI output (optional)
- 20 - Main voice-processed output
- 21 - Instrument thru to stage amp
- 22 - AC power input
- 23 - Instrument input to DI (optional)
- 24 - Inst ground: in=lifted
- 25 - Balanced mic input

NOTE

- Turn down your PA when making all connections.
- The USB connection does not provide power to the unit.
- If you hear hum from your PA or amp, push the GRND in. Otherwise, it should remain out.

First Setup and Use

- 1 Turn down your PA's master volume.
 - 2 Connect your mic, PA and AC adaptor to Correct XT as shown in the diagram. For live performance, a USB connection to a computer is not required.
 - 3 Sing into your mic while adjusting the Input control so that the level LED flashes amber on peaks.
 - 4 Set remaining knobs to center detent and ensure only the 2 Adaptive buttons are lit. Press the Tone footswitch so it's LED lights.
 - 5 Sing while turning up your PA volume to a comfortable level.
- There will be a brief adaptive period as you sing then your voice will sound brighter and lightly compressed. From here you can experiment with the features of Correct XT.

Phantom Power

Ensure your PA is muted. Hold Warmth and Manual buttons together to engage 48v phantom power for condenser mics. This setting is retained over power cycles.

Features Detail

Tone - The Tone footswitch activates the Shape and Dynamics processors which produce a "studio" vocal sound. Shape is a single-knob, multiband EQ that removes muddy lows due to microphone proximity effect while adding silky brightness. The Dynamics feature uses a high quality compressor and de-esser to tame volume peaks in both vowel sounds and sibilants (sss sounds). Warmth is a part of shape that boosts low frequencies for added warmth without muddiness.

Adaptive Shape and Adaptive Dynamics - Typically the two Adaptive LEDs should be lit so that Shape and Dynamics are tailored to your specific voice and it's moment to moment requirements. For example, a woman singing high in her range farther from the mic requires different EQ and compression than a deeper male voice singing right on top of the mic.

Pitch Correct - This helps you to be more aware of your singing pitch as well as to nudge you gently closer to being in-tune. It's like a metronome for singers. Your pitch is instantly compared to notes in a chromatic scale (all notes are valid) and quickly shifted closer to the nearest semitone. The Pitch knob controls the speed and amount of correction. The center detent setting is the most natural sounding while still providing useful correction. Note that you will hear the effect; it is similar to chouring but this is only heard by you and perhaps anyone nearby who can hear both your natural voice acoustically and your amplified and pitch-corrected voice.

Gate: This auto gate reduces mic level when you're not singing. It can be useful for reducing feedback as well as to minimize instrument leakage through the PA via your mic.

Anti-Feedback - Auto: This feature provides extra protection from squeals and rings during performance once you've followed the [Tips for Avoiding Feedback listed below](#). To enable automatic anti-feedback turn the Anti-FB LED on and the Manual LED off. This algorithm constantly looks for pure feedback tones caused by your mic and will engage one of its nine filters for each frequency up to nine in total. The bands are extremely narrow to minimize degradation of your vocal tone when and if they become active. If all nine bands become activated, further feedback will cause Correct XT to turn down the volume of your mic by 3 dB once only. At this point, you should turn your PA/monitors down and reset the filters (see below).

Anti-Feedback - Manual: When this button is lit, anti-feedback problem frequencies will only be detected and eliminated when you press both footswitches together. Manual mode may work better when there are instruments in your band capable of pure tones such as Rhodes or flute which could fool the Auto algorithm.

Anti-Feedback On/Off & Reset: The Anti-FB button can be toggled to compare pre and post anti-feedback sound if desired. Holding the Anti-FB button when it's LED is lit initializes all filters. CAUTION: Anti-FB off & Reset can both induce feedback.

TIPS

- Ensure your monitor and/or PA speakers don't aim directly at the front of your mic
- Sing confidently and close to the mic, even touching the grill with your lips
- Try a super-cardioid dynamic mic such as TC-Helicon's MP-70 and MP-75
- Set your PA channel EQ and graphic EQ flat
- Have your band play quieter on stage and lower PA/monitor volume

The VoiceSupport Application

VoiceSupport is your way of getting the most from your TC-Helicon product, as well as letting your product grow with firmware updates. VoiceSupport includes:

- Access to the latest firmware updates and features
 - Videos, artist profiles, tips & tricks
 - Registration of your product
- To access the VoiceSupport application:
1. Download VoiceSupport from www.tc-helicon.com/voicesupport.
 2. Install VoiceSupport on your computer.
 3. Connect your product via USB to your computer.
 4. Run VoiceSupport.
 5. Read the news, click on tabs and browse the features of the application.

(DE) Einleitung

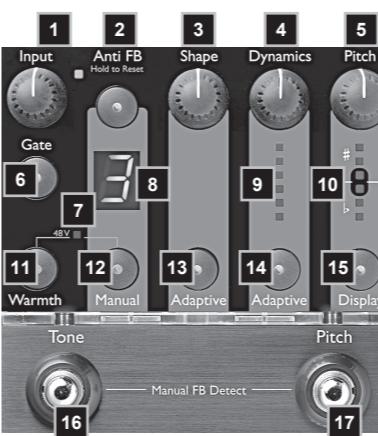

Mit dem VoiceTone Correct XT können Sie Ihr Publikum auch live mit einem Vocal-Sound in Studioqualität überzeugen. Und die integrierte automatische Rückkopplungsunterdrückung schont Ihre Nerven.

Wir gratulieren Ihnen zum Kauf Ihres Correct XT. Verwenden Sie es, um Ihre Stimme höhnerreicher, ausgewogen und tressicher klingen zu lassen – und das alles, ohne erst den Umgang mit kompliziertem Outboard-Equipment lernen zu müssen. Und wenn Feedback droht, macht die automatische Rückkopplungsunterdrückung kurzen Prozess mit unerwünschten Pieper und Jaulen.

- Extreme einfache Einrichtung und Steuerung
- Der adaptive Multiband-Shape-EQ passt sich dem individuellen Klang Ihrer Stimme an.
- Separate Ein-/Aus-Taster für Klangebearbeitung (Tone) und Tonhöhenkorrektur (Pitch)
- Der integrierte Kompressor und der De-Esser „entschärfen“ Pegelspitzen und Zischlaute
- Symmetrische XLR-Ausgang und -Eingang mit Phantomspeisung für Kondensatormikrofone
- Klinkeneingang für Durchlagent im Di-Box
- Per USB an Computer anschließbar – für einfache Firmware-Updates, News und Tipps mit Hilfe der kostenlosen Software VoiceSupport

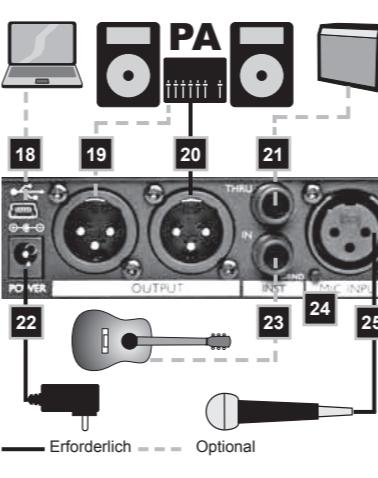

www.tc-helicon.com - www.youtube.com/tchelicon

Vorderseite

- 1: Input-Regler und -LED: (grün = Signal liegt an; rot = übersteuert)
- 2: Rückkopplungsunterdrückung an/aus. Achtung – siehe unten
- 3: Shape – für einen höhnerreichen, transparenten Sound
- 4: Dynamics – Komprimierung und De-Esser
- 5: Pitch – Intensität der automatischen Tonhöhenkorrektur
- 6: Automatisches Gate an/aus
- 7: Statusleuchtdiode für Phantomspeisung
- 8: Anzahl der aktiven Rückkopplungsunterdrückungsfilter
- 9: Kompressionsintensität: Eine Leuchtdiode pro dB
- 10: Tonhöhenkorrektur-Anzeige
- 11: Warmth – Bassanhebung ohne „Vermatschen“ des Klangbilds

Anschlüsse an der Rückseite

- 12: Rückkopplungsunterdrückung manuell an/aus.
- 13: Passt den Shape-EQ an Ihre Stimme an
- 14: Passt die Komprimierung an Ihren Gesang an
- 15: An- und Abschalten von Shape-EQ und Dynamikbearbeitung
- 16: An- und Abschalten von Tonhöhenkorrektur
- 17: An- und Abschalten der Tonhöhenkorrektur
- 18: USB-Anschluss zur Verbindung mit einem Computer
- 19: DI-Ausgang für Instrument (optional)
- 20: Hauptausgang – bearbeitete Stimme
- 21: Durchleitung Instrumentensignal an Bühnenverstärker
- 22: Netzbuchse (Wechselstrom)
- 23: Instrumenteneingang > DI (optional)
- 24: Ground Lift-Taste (gedrückt: aktiv)
- 25: Mikrofoneingang (symmetrisch)

NOTE

- Wenn Sie die Verbindungen zu diesem Gerät herstellen, sollte Ihre PA stummgeschaltet sein.
- Das Gerät wird über die USB-Verbindung nicht mit Strom versorgt.
- Wenn Sie aus Ihrem Verstärker oder der PA ein Netzbrummen hören, drücken Sie die Ground-Lift-Taste. Ansonsten sollte diese Taste nicht gedrückt sein.

Konfiguration und Inbetriebnahme

1. Senken Sie zunächst den Regel von Ihr Verstärker oder der PA ab.
2. Schließen Sie das Correct XT zunächst an die Absteckung an Ihr Mikrofon und Ihre PA an und stecken Sie die Power-Kabel in die entsprechenden Buchsen. Die USB-Kabel wird beim Live-Einsatz nicht benötigt.
3. Singen Sie in Ihr Mikrofon und passen Sie mit dem Input-Regler die Eingangsempfindlichkeit so an, dass die Pegel-Leuchtdiode bei Pegelspitzen blinkenfähig leuchtet.
4. Stellen Sie die verbleibenden Regler auf die neutrale Mittelposition und achten Sie darauf, dass diese beiden Adaptive-Leuchtdioden leuchten. Drücken Sie den Taster Tone, so dass dessen Leuchtdiode leuchtet.
5. Singen Sie, während Sie den Regel an Ihrer Verstärkeranlage erhöhen, bis der gewünschte Pegel erreicht ist. Während Sie singen, erfolgt eine Anpassung, bei der Ihre Stimme kurzzeitig höhnerreicher und leicht komprimiert zu hören ist. Jetzt können Sie damit anfangen, mit den Funktionen des Correct XT zu experimentieren.

Phantomspeisung

Achten Sie darauf, dass Ihre Verstärkeranlage stummgeschaltet ist. Um die 48V-Phantomspeisung für Kondensatormikrofone zu aktivieren, drücken und halten Sie gleichzeitig die Tasten Warmth und Manual. Diese Einstellung bleibt auch nach dem Abschalten des Gerätes erhalten.

Die Funktionen im Detail

Tone-Bereich:

Drücken Sie den Taster Tone, um die Shape- und Dynamics-Prozessoren zu aktivieren. Sie verleihen Ihrer Stimme einen professionellen „Studiostimmen“. Der

(IT) Introduzione

VoiceTone Correct XT dona alla voce la tipica sonorità delle produzioni da studio, garantendo totale tranquillità grazie alla funzione anti-feedback automatica.

Congratulazioni per aver scelto Correct XT, il pedale capace di rendere la voce più brillante, bilanciata e intonata come non mai, senza dover imparare l'utilizzo di complicate apparecchiature. Inoltre, nel caso in cui il feedback costituisca un problema, la funzione automatica anti-feedback è in grado di intercettare e neutralizzare velocemente ogni fastidioso fischi e stridio.

- Configurazione e controllo super-semplice
- EQ Shape multibanda che si adatta alla voce in ingresso
- Pulsanti On/Off separati per funzioni Tone e Pitch
- Compressione e De-ess utili per livellare i picchi di livello e le sibilanti
- Ingresso e uscita XLR bilanciati completi di alimentazione phantom per microfoni a condensatore.
- Pratico ingresso per strumenti con connessione "input to DI" (jack da 1/4")
- Porta USB per il collegamento al computer, utile per gli aggiornamenti del firmware e la ricezione di news e suggerimenti tramite l'applicazione gratuita VoiceSupport.

www.tc-helicon.com - www.youtube.com/tchelicon

(FR) Introduction

VoiceTone Correct XT donne à votre voix un son digne d'une production studio avec en plus la tranquillité d'esprit que procure la fonction anti-feedback automatique.

Félicitations pour votre achat d'une Correct XT. Utilisez là pour rendre votre voix plus brillante, plus équilibrée et plus juste que jamais, sans avoir à apprendre la manipulation d'équipements en racks compliqués. Lorsqu'un problème de feedback survient, la fonction anti-feedback automatique chasse et réduit rapidement au silence ces sifflements intempestifs.

- Contrôle et réglages super-simples
- Egaliseur Shape multibande qui s'adapte individuellement à votre voix.
- Interrupteurs au pied séparés pour Tone et Pitch
- Compresseur et De-esser pour adoucir les crêtes et les sibilantes
- Entrées et sorties sur XLR symétriques, avec alimentation phantom pour micros à condensateur.
- Entrée instrument 1/4" pour fonction boîtier de direct
- Connexion USB pour ordinateur permettant les mises à jour de logiciel, la consultation de conseils et astuces via l'application gratuite VoiceSupport.

(JP) イントロダクション

VoiceTone Correct XT は、ヴォーカルをスタジオ・レコーディングのサウンドに仕立て上げながら、自動アンチ・フィードバック機能によるライブ時の安心を提供します。

この度は、Correct XT をお買い上げいただき、ありがとうございます。Correct XT は、複雑なアウトボード機材を必要とすることなく、ヴォーカル・サウンドをよりバランス良くプライに整え、ピッチをより正確にします。フィードバックに悩まされる場面においては、自動アンチ・フィードバック機能が耳をつんざくフィードバック成分を素早く制御します。

- 超シンプルなセットアップとコントロール
- シンギュラの声の特性に順応して処理を行なうマルチバンド・シェイプEQ
- トンとピッチ処理に個別のオン/オフ・フットスイッチを用意
- ピックやシザーリング(擦音)を制御するコンプレッサーとディエッサー
- コンデンサーマイク用アンプとトランジistor・バート対応のバランスXLR入力ならびに输出
- 1/4インチストラップメント・インプラットト DI アウトの便利機能を搭載
- コンピュータ接続用のUSB端子を搭載。VoiceSupport アプリケーションからファームウェア・アップデート、ニュース、使用上のヒントなどを入手または閲覧できます
