

MIDAS Pro 1/2/2C/X

Version G3.4.4 (24 May 2018)

NEW FEATURES

No new features - this is a bug fix release only

ADDRESSED ISSUES

- Fixed an issue where Shutdown sequence would occasionally leave inactive MC on
- Fixed an issue where Neutron could intermittently boot-up with a DSP appearing red in diagnostics
- Fixed an issue where DL231 would sometimes boot-up as red in diagnostics and not pass comms
- Fixed an issue which caused generic AES50 tie-lines to appear red in diagnostics for Pro X
- Fix for the ASRC (in Neutron NB/IO Expansion card) - improved stability for very high volume audio

UPDATE PROCEDURE

Use regular update procedure for all Pro series updates
