VOICETONE C1

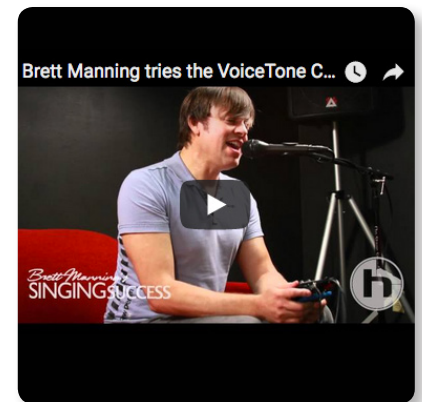

Simple 1-Button Stompbox for Flexible Pitch Correction

- Simple single-button stompbox gives you flexible pitch correction choices to control your sound
- Gentle or aggressive tuning puts your voice right on pitch
- Manual or guitar-controlled key/scale selection
- Wide range of pitch correction capability, from natural to robotic
- Simple 3-knob control gets you up and running in seconds
- High-quality, low-noise mic preamp for pristine vocals
- On/off foot switch for quick performance control
- Allows chaining to other VOICETONE SINGLES vocal processors or DITTO MIC LOOPER to expand creative possibilities
- Compatible with remote Mic Control using the TC HELICON MP-75 microphone
- Rugged, road-worthy construction for years of dependable use
- Power supply included
- 3-Year Warranty Program*
- Designed and engineered in Canada

Watch VOICETONE C1 at Work

Singer-songwriter Christine Havrilla adds intrigue to her song with some HardTune at 1:00 & renowned vocal coach Brett Manning shows off some of the wild possibilities of C1.

New Vocal Territory

VOICETONE C1 starts with a clean, transparent correction of your voice – just set the key and go – or use the guitar input. It ends with the wildly popular pitch-gliding HardTune effect. A twist of the gender knob really gets you sounding like an alien with some fascinating biological choices...

Stompboxes

VOICETONE C1

Simple 1-Button Stompbox for Flexible Pitch Correction

It's Just this Simple...

- Plug in your mic, plug your pedal into the mixer & set the gain
- Turn on the effect
- (That's it)

Of course, you can always change the style or the amount of correction, but you shouldn't need the manual – unless you're making a fire!

Chain It

You can chain VOICETONE C1 to all of the other VOICETONE singles, mixing and matching effects to define your personal sound. It also works with DITTO MIC LOOPER, the pure looping pedal for singers and instrumentalists. Use the Singles Connect Kit (available separately) to mix and match up to 4 TC HELICON vocal effect pedals together conveniently, simply – and with less cable clutter than ever before.

Under The Hood

Beneath VOICETONE C1's sturdy, die-cast metal case, you'll be getting the same quality processing you've come to expect from our flagship Voicelive® vocal processors. You'll also find a clean, quiet mic preamp that rivals high-end touring mixers, plus studio-quality analog to digital conversion. There's even a USB connection for firmware updates.

Simple 1-Button Stompbox for Flexible Pitch Correction

Vocal Bending Gymnastics

1. Simple guidance of pitch correction with key, chromatic or guitar input
2. Control your attack from subtle correction to jagged HardTune
3. Adjust your vocal biology from male/deep gender to alien female
4. Dedicated on-off footswitch and USB connection for updates

More Mic, More Control

Beneath VOICETONE C1's sturdy, die-cast metal case, you'll be getting the same quality processing you've come to expect from our flagship Voicelive® vocal processors. You'll also find a clean, quiet mic preamp that rivals high-end touring mixers, plus studio-quality analog to digital conversion. There's even a USB connection for firmware updates.

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own **MUSIC Tribe** factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous **Warranty program**.
